Truth in Savings Disclosures

- Rate Information** – The Interest Rates and Annual Percentage Yields on your deposit account are stated above and may change at any time as determined by us, except as otherwise disclosed herein. The APY is a percentage rate that reflects the total amount of interest to be paid on an account based on the interest rate and frequency of compounding for an annual period. The APY assumes that interest will remain on deposit until maturity. A withdrawal of interest will reduce earnings.
- Nature of Dividends** - Dividends on Savings are based upon the Credit Union’s current income and available earnings after transfers for required reserves at the end of a dividend period. The Dividend Rate and APY stated on the Rate Sheet reflect the earnings the Credit Union anticipates having available for distribution.
- Compounding and Crediting** – The Rate Sheet describes the time frames for compounding and crediting interest.
- Balance Information** – The High Interest Savings Account requires a \$10,000.00 minimum balance to open the account and to earn the higher APY. Interest is calculated by the daily balance method, which applies a daily periodic rate to the full amount of principal in the account each day.
- Accrual of Interest** – Interest will begin to accrue on cash deposits and on non-cash deposits (e.g. checks) on the business day you make the deposit to your account.
- Nontransferable/Nonnegotiable** – All accounts are nontransferable and nonnegotiable. The funds in your account may not be pledged to secure any obligation of an owner, except with the Credit Union.
